Editorial Team;
Bawo James, Chris Ibe

From the President's Desk

It is my pleasure to welcome you on board as well as introduce you to our maiden edition of ISSUP Nigeria Chapter bulletin tagged "So-lace". Welcome on board!

As we may already know, the Nigerian Society of Substance Use Prevention and Treatment Professionals, aptly called ISSUP Nigeria Chapter, is the host association of International Society of Substance Use Prevention and Treatment Professionals (ISSUP) in Nigeria. ISSUP Nigerian Chapter is a registered association under part C of the Company and Allied Matters Act of the Federal Republic of Nigeria with a Certificate of Incorporation dated December 12, 2018.

The evolution of ISSUP Nigeria Chapter began in 2016 during my participation at the 2nd global conference of ISSUP that held in Campinas, Brazil between 5th and 10th of December, 2016. At that conference, it became obvious that Nigerian practitioners in the field of substance use prevention, treatment, recovery including research and policy need to join hands together with the rest of the world in order to be abreast with current developments and opportunities with respect to drug demand reduction across the globe.

Subsequently, a window of opportunity to bring together the first network of Nigerian stakeholders in unison with ISSUP vision and philosophy came in July 2017 when we had the first Universal Treatment Curriculum for Substance Use Disorders training at the Federal Neuropsychiatric Hospital, Yaba, Lagos State, Nigeria. It was here that ISSUP Nigeria Chapter was given birth to. We started with a three (3) member coordinating team: Dr. Olajumoke Koyejo, Dr. Chai Francis and my humble self. The momentum increased as the network expanded from three to nineteen between the end of July 2017 and December, 2018. All the 19 persons formed the first ever executive council of ISSUP Nigeria Chapter. This council has been the engine room that has been driving increased membership and participation of different stakeholders in drug demand reduction across the six geopolitical zones of Nigeria.

It is vital to highlight that together with important personalities in the persons of Professors Musa Abba Wakil, and Isidore Silas Obot as well as Dr. (Mrs.) Abosede Taiwo Adamson who are all members of Board of Trustees of ISSUP Nigeria Chapter, the team has collaborated to get our association formally registered. Today we have six (6) zonal coordinators for the six geo-political zones in Nigeria as well as state coordinators and executive committee at the state levels.

The vision of ISSUP Nigeria Chapter is to build a united, trained, skilled, knowledgeable and effective national network of substance use prevention, treatment, recovery and research professionals undertaking and promoting high quality evidence-based substance use prevention, treatment, recovery and policies.

ISSUP Nigeria Chapter aims to develop multidisciplinary networks of core and allied professionals abreast with up-to-date evidence-based effective drug demand reduction and control interventions. The objectives are itemized as follows:

1. To support and build national and local capacity for substance use research, prevention, treatment and recovery among professionals for effective and efficient service delivery.
2. To collaborate with all levels of Nigerian government and build positive relationships between Nigerian government, local and international organizations towards evidence-based and cost-effective drug demand reduction control in Nigeria.
3. To promote and support evidence-based professional information sharing that includes evidence-based, high quality, and ethical policies and practices with respect to substance use prevention, treatment and recovery.
4. To provide sustainable platforms for meaningful contributions towards substance use prevention, treatment and recovery by engaging local communities and allied professionals to address specific local drug issues within the micro- and macro-environments
5. To engage in such acts and things as may be necessary and/or incidental to the aforesaid aim and objectives and as may be agreed to be taken up by the governing board from time to

time.

Our membership cuts across different professions or disciplines, and organizations. The membership is disaggregated into six (6) main categories: student, standard, advanced, certificate, honorary and fellows. Each of these categories has its minimum set of requirements.

Why we need to build a team

In view of the above, ISSUP Nigeria Chapter thus provides a healthy and mature forum where all professionals in the field of substance use prevention, treatment, recovery and research have optimal opportunity to interact, collaborate and establish partnerships. We encourage the sharing of latest information, trends and research opportunities in relation to substance use and the promotion of evidence-based prevention and treatment interventions among its members.

Our Association also provides training and credentialing opportunities, events and programmes for members at the state, zonal, national and international levels. Joining the Nigerian Chapter of ISSUP means a high level interest in the latest information and opportunities with regards to substance use, prevention, treatment, recovery, research and related disciplines. Membership benefits also include being signed up to a code of ethics which demonstrates the following: professionalism; ability to demonstrate membership within a professional field of work; participation in the annual and other Global ISSUP events with member benefits, which includes full sponsorship and receipt of a range of appropriate letters of attestation/recommendation from the national chapter to ISSUP global or other international associations affiliated to ISSUP.

Our members use ISSUP logo as part of members' CV/professional profile and their certificates of membership reflect their status as valid ISSUP members. In addition, there are other opportunities that include free access to news of relevant jobs and other professional opportunities; opportunities to network with other professionals in the field of drug demand reduction in Nigeria and globally; avenues to receive technical supports and to have capacity building to enhance members' work on substance use

prevention, treatment, recovery and research towards effective and efficient service delivery.

At this time, we look forward to working with relevant stakeholders who will introduce addiction studies to our higher institutions of learning in Nigeria. Within this perspective, such stakeholders will be incorporated into the International Consortium of Universities for Drug Demand Reduction (ICUDDR). This project will help with our long term goal of professionalizing Drug Demand Reduction in Nigeria.

Please join us as we work together to find lasting cost-effective solutions to the menace of substance use and related problems in our country, Nigeria. This is not the time to sit on the fence. The task we fail to perform today may hurt us tomorrow. We must protect our future generations from the scourge of substance problems and complications. Once again, Welcome on board!

Dr. Martin Agwogie

5th GLOBAL ISSUP Conference, Vienna, Austria (July 1-5, 2019)

ISSUP in partnership with UNODC held the International Conference on Drug Prevention, Treatment and Care – Inspiration and Direction. The opening ceremony took place on the 1st July, 2019 at the Vienna International Conference Centre and it was declared opened by the Director General of UNODC, Dr. Yuri Fedopov.

Nigeria was represented by a 10-man delegation consisting of: Dr Martin Agwogie, Dr. Ibrahim A. Wakawa, Dr. Williams Ebiti, Dr. Suwa Goar, Prof Bola Ola, Prof Moses Audu, Mrs Esther Audu, Mrs Maria Ilubughi, Mr. Isaac Olatunde, Mr. Akinyemi Abimbola, and three Nigerian students delegate from Belarus and Hungary namely Miss Rose Okonta, Miss Blessing Anioke and Mr. Nanle Gusen..

ISSUP Nigeria was represented at the national chapter meeting by the VP; Dr. Ibrahim Abdu Wakawa and intermittently by the President, Dr. Martin Agwogie. There were several presentations at the national chapter meetings including on how to maintain social media platforms, how to embark on membership drive and financial sustainability for national chapters. There were also deliberations on uniform membership struc-

ture for all chapters. There were presentations by the Director Drug Demand Reduction, INL, Mr. Brian Morales as well as Jeff Lee and Joanna Travis-Roberts from ISSUP Global.

Highlights of the event was the signing of the document formally recognizing Nigeria as a national chapter. Apart from presentations at the plenary and other syndicate sessions, there were other training sessions which included the Global Drug Demand Reduction training, UTC 16 on advanced clinical skills, and school-based intervention amongst others.

Dr. Ibrahim Abdu Wakawa

Meet the Executives of ISSUP Nigeria
