

Emerging Trends in

Drugs, Addictions, and Health

*The official Journal of the International
Society for Emerging Drugs (ISSED)*

EDITOR-IN-CHIEF:

Ornella Corazza, PhD
*University of Hertfordshire
Hatfield, United Kingdom*

Emerging Trends in Drugs, Addictions, and Health is a new international Journal devoted to the rapid publication of authoritative papers on Novel Psychoactive Substances (NPS), Addictions and associated health phenomena. The Journal has a multidisciplinary nature and aims to bring together studies which are relevant for heterogeneous authors and readers.

Manuscripts related to pharmacology, clinical practice, doping science, mental health, public health, forensic medicine, experimental psychology, genetics, molecular biology, internal medicine, neuroscience, health psychology, health policy, health economics, and treatment trials are encouraged for submission as far as they deal with the ever changing world of addictions and psychoactive substances.

The overall purpose of the Journal is to contribute to improve the knowledge on the field with a comprehensive biological, psychological, and social perspective.

United States*

Ornella Corazza,
University of Hertfordshire, United Kingdom

Andres Roman-Urrestarazu,
University of Cambridge, United Kingdom

This Special Issue of *Emerging Trends in Drugs, Addictions, and Health* explores new drug and behavioral trends during the Covid-19 Pandemic. We welcome multidisciplinary contributions aimed at enhancing the understanding of how “physical distancing” and other radical changes in our lifestyles might lead to the consumption of new emerging drugs and other risky behaviors.
